A personal message from VILBO
My motivation for being a Cryos International donor

My motivation for becoming a sperm donor is that I was watching a television program about becoming a donor and the challenges for family's not being able to have a child without help. It struck a nerve within me and after talking with my girlfriend I have decided to become a sperm donor and hopefully help people. So I hope that you will get that child that you clearly so much want. Good luck and all the best wishes to you.
